

**Press Release:**

**Marathon Special Products Releases 7/16" Sectional Terminal Blocks**

BOWLING GREEN (July 19, 2010) – Marathon Special Products, an industry leader in electrical/electronic components, has released a new addition to their Sectional Terminal Block offering.

The new **7/16" Sectional Terminal Blocks** have been tested and comply to UL and CSA standards. This includes versatile capabilities such as use with multiple wires and with flexible stranded wire classes.

These small profile blocks accommodate lugged or bare wires up to 40 amps, and are mountable on standard DIN rails. The new series has a robust design that allows it to withstand abuse that tends to break or distort existing sectional blocks.

These blocks are ideal for elevator systems and industrial control panels where flexibility of circuit design is necessary.

For further details on the newly released 7/16" Sectional Terminal Blocks and other products including Power Blocks and Fuse Holders, please visit <http://www.marathonsp.com/> or write to [marketing@marathonsp.com](mailto:marketing@marathonsp.com).
