November 26, 2018

Dear Regal Marathon® Special Products (MSP) Customers,

Since 1931 Regal's Marathon Special Products brand has consistently served the electrical component industry. Today, more than 99% of our products are assembled right here in the United States. Our history of delivering innovative, quality products, in a timely manner, at tariff free pricing has made us a leader within the industry.

To complement our U.S based manufacturing capabilities, we also utilize our global footprint to bring the best value possible to our customers in some of our newest product innovations.

MSP strives to serve our customers with world class quality workmanship, industry leading service, and innovative products directly from our U.S. based facility here in Bowling Green, Ohio.

That is why today, more than 85 years after our inception, our practice of utilizing local labor resources and U.S. sourced components sets MSP apart from our competition and makes us the market choice for your power block, terminal block and fuse holder requirements.

We look forward to building on that legacy. Thank you for your business!

Thanks again,

Marathon Special Products
