PRODUCT CHANGE ANNOUNCEMENT

Marathon Special Products is announcing a change to the FDS Series of Fused Disconnect Switches. This product change only applies to the printing of the terminal ID's at the wire termination points and the format of printing information on the side. There is no functional or ratings change to the product. This change is being implemented to have consistent terminal ID's that are common in the market.

This will be a running change with no variance to the part numbers or ratings.

Below illustrates the change per terminal ID of each model variation. Existing printing is shown on the part.

Below illustrates the change from a side labeled to a printed product. Existing labeled product is on the left, and the new printed style on the right. .

Again, this will be a running change with no variance to the part numbers or ratings.

Products will be converted to the new design **around early December 2020**, but will vary depending on when old inventories are displaced.

FDS Series Part Numbers Affected:

FDS30C1	FDS30C2	FDS30C3
---------	---------	---------

Please feel free to email or call with any questions regarding this product modification.

Thank You,

Regards,
Joe Brown
