SUBJECT: PRODUCT OBSOLESCENCE NOTIFICATION

MARKING STRIP (MS) MATERIALS, PRINTING SYLES AND INSULATOR STRIPS

As part of our product line simplification initiatives, Marathon Special Products will be discontinuing the following products:

- Marking Strips & Insulator Strips Made from GEE material
- Marking Strips with printing styles other than 01A or 01X
- Individual insulator strips with no Marking area. Only MS's are to be sold going forward.

This affects all active and existing parts noted in the tables below. This product discontinuance is due to the low use of these options, that are all functionally covered by the remaining marking strip options which also provide insulation.

This change is effective 8/31/23. Your internal specifications and/or agency files may need to be updated to reflect this. All last time buys must be in hand by May 31st 2023.

The alternatives listed below are form and fit alternatives. Some will have slight dimensional changes and/or printing differences, although the printed terminal ID will still match the number in almost all cases. If there is a change in printing on each terminal, that may alter the function.

Please feel free to email or call with any questions regarding this product modification.
