## PRODUCT OBSOLESCENCE ANNOUNCEMENT

Marathon Special Products is eliminating the “**XXXPFR**” (flame retardant) Marking/Insulator Strip material option for our various terminal blocks. This is primarily due to diminished demand. Affected catalog series numbers can be determined from the nomenclature noted below as well as the current catalog:

Ordering Code:

Descriptions:	Strip Type	Series	Material	Feed Thru (if applicable)	Number of Terminals	Print Style
Example:	MS	671	XP	Y	16	01A

MS = Marking Strip	410	XP	Y	---	See
IS = Insulator Strip	411	<b>XXXPFR</b>	(Blank)		Printing
	599 (799)	GME			Style
	600 (800)	GEE			Selection
	601 (801)				
	602 (802)				
	603				
	604				
	605				
	621				
	670 (100)				
	671 (200)				
	672 (300)				
	699 (899)				
	812 (912)				

MS-xxx-XP-04-01A

**We will continue to offer this style of marker strip in our XP, GEE & GME versions.** The GME material options is the most comparable material option to transition to as they have very similar flame retardant properties.

**This change is to take place on July 30<sup>th</sup>, 2017.** Any order for product after July 30<sup>th</sup>, 2017, is subject to review and may be rejected should we not have the necessary components to complete the order. Feel free to e-mail or contact me with any questions about this change.
